PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience building web and mobile applications, database-driven systems, and an educational game using C#, PHP, JavaScript, Kotlin, Flutter, SQL, Firebase, and Unity. Completed a 500-hour IT internship at Panasonic Manufacturing Philippines Corporation, supporting hardware troubleshooting, preventive maintenance, technical issue resolution, and SAP-based sales processes. Brings an ownership-focused approach to development, with experience translating requirements into working features, integrating backend services, and solving technical problems independently. Eager to contribute as a Software Developer or Associate Software Engineer while continuously expanding technical skills.

TECHNICAL SKILLS

Languages: C#, PHP, Java, JavaScript, Python, Kotlin, SQL

Web: HTML5, CSS3, JavaScript, PHP, React

Mobile: Flutter, Android Studio, Kotlin

Backend & Data: PHP, MySQL, SQL, Firebase, Supabase

Tools: Git, GitHub, Unity, SAP

IT Support: Hardware Troubleshooting, Technical Support, Preventive Maintenance, Networking Fundamentals

Security: Cybersecurity Fundamentals, Security Best Practices

PROFESSIONAL EXPERIENCE

Panasonic Manufacturing Philippines Corporation — IT Intern | 500 Hours *February - June 2026*

- Diagnosed and resolved hardware and software issues on workplace computers and peripherals, helping maintain reliable day-to-day IT operations.
- Configured and maintained computer equipment and network-connected devices, supporting users with technical issues and system readiness.
- Performed preventive maintenance and basic diagnostics on IT equipment to identify issues before they disrupted normal operations.
- Supported end users with technical troubleshooting and issue resolution, strengthening service continuity and workplace productivity.
- Used SAP to support sales-related processes, data management, and transaction monitoring, gaining hands-on exposure to enterprise business systems.
- Collaborated with IT personnel on daily support activities, applying structured problem-solving and clear communication in a professional environment.

PROJECTS

Web-Based Learning Management System — PHP, JavaScript, SQL

- Designed and built a role-based LMS from the ground up, architecting separate permission structures for teachers and students to eliminate manual activity tracking.
- Implemented end-to-end workflows for activity uploads, submissions, and grading, taking the system from database design through to a working, usable product.

Task Management App — Kotlin, Android Studio, PHP, SQL

- Built a native Android application integrated with a custom PHP/SQL backend, enabling real-time task tracking and completion status for student users.

Expense Tracker — Flutter, Firebase

- Developed a cross-platform mobile app with real-time Firebase synchronization, allowing users to record and categorize expenses consistently across devices.

EduRun Game — Unity, C#, PHP, HTML, SQL

- Built an educational run-to-learn game with a companion web-based admin dashboard, giving instructors direct control over game-based learning content.
- Independently scoped, designed, and shipped four full applications outside of coursework, spanning web, mobile, and game development end to end.

EDUCATION

BS in Information Technology — Our Lady of Fatima University *2022 - Present*

Senior High School — Our Lady of Fatima University *2018 - 2020*

Junior High School — Dela Paz National High School *2014 - 2018*
