

CHRISTIAN I. ASUNCION

Antipolo City, Rizal | +63 993 132 1953 | christianasuncion013@gmail.com

OBJECTIVE

Motivated and detail-oriented Information Technology graduate with a strong foundation in software development, web development, database management, networking, and cybersecurity fundamentals. Seeking an entry-level opportunity to apply technical knowledge and analytical skills to develop effective technology solutions. Eager to learn emerging technologies, continuously improve and adapt skills, and take on new challenges that foster personal and professional growth. Dedicated to contributing to organizational success through innovation, collaboration, integrity, and a commitment to lifelong learning.

TECHNICAL SKILLS

Programming Languages: C#, PHP, Java, JavaScript, Python, Kotlin, SQL

Web Development: HTML5, CSS, PHP, React, JavaScript

Mobile Development: Flutter, Android Studio (Kotlin)

Tools and Technologies: Firebase, Git, SAP (Systems, Applications, and Products)

IT Support and Networking: Computer Troubleshooting, Hardware Installation and Maintenance, Technical Support, Networking Fundamentals

Cybersecurity: Cybersecurity Fundamentals, Security Best Practices

Soft Skills: Problem Solving, Communication, Adaptability, Willingness to Learn, Work Ethic, Time Management

EXPERIENCE

IT Intern (On-the-Job Training, 500 hours), Panasonic Manufacturing Philippines Corporation *February 2026 - June 2026*

- Assisted with hardware-related IT tasks, including computer setup, troubleshooting, maintenance, and technical support for end users.
- Performed basic diagnostics and preventive maintenance on computer systems, peripherals, and network-connected devices.
- Supported monitoring and resolution of hardware and software issues to ensure smooth business operations.
- Gained hands-on experience using the SAP (Systems, Applications, and Products) system for sales-related processes, data management, and transaction monitoring.
- Developed practical skills in IT support, hardware management, enterprise systems, and workplace communication.

PROJECTS

EduRun Game

- Built an educational run-to-learn game using Unity and C#, with a web-based admin system using HTML, CSS, PHP, and SQL.

Web-Based Learning Management System

- Built a Learning Management System (LMS) using HTML, CSS, PHP, JavaScript, and SQL, with role-based access for teachers and students.
- Implemented activity uploads, submissions, and grading workflows to improve user engagement and educational management.

Task Management App

- Developed an Android task management application in Kotlin using Android Studio, enabling students to organize, schedule, and manage tasks.
- Integrated a PHP and SQL backend to support real-time data processing and task completion tracking.

Expense Tracker

- Created a mobile expense tracking application using Flutter and Firebase, enabling users to record and categorize daily expenses.
- Implemented real-time data synchronization for transaction history to support personal finance management.

EDUCATION

BS in Information Technology, Our Lady of Fatima University	<i>2022 - 2026</i>
Senior High School, Our Lady of Fatima University	<i>2018 - 2020</i>
Junior High School, Dela Paz National High School	<i>2014 - 2018</i>

CERTIFICATIONS

- AI Fundamentals with IBM SkillsBuild (June 2026)
- The Digital Fabric: AI Imperatives and Risk, Quantum Computing, and Automated Business and Multimedia Augmentation (December 2025)
- Cybersecurity Awareness: Protecting Yourself Online (October 2025)
- Beyond the Office: Adapting to a New Era of Remote IT Support (November 2024)
- Infrastructure and Cloud Computing (November 2024)
- Intro to Game Development and Web Development (October 2024)
- Unlocking GoHighLevel: Essential Tools for CRM Success (October 2024)
- Getting Ghosted: Facing Cybersecurity 2024 (October 2024)
- Introduction to SQL (October 2023)
- IT Flexperience (May 2022)
- Certiport: IT Specialist-Python (July 2026)
- JavaScript Essentials 1 (July 2026)
